DONOR APP

Overview

An intuitive platform that connects the the gap between various donors and NGO's

Credibility

Vetting of Donee organization and Donor so that donor is not worried and can donate compassionately.

Quality Check

The products donated would be scored by the donee so that quality is not compromised.

PRIVACY & SAFETY

Overview

One of the major reason people refrain from donating is inhibition to their privacy. We have made sure that donor anonymity is maintained.
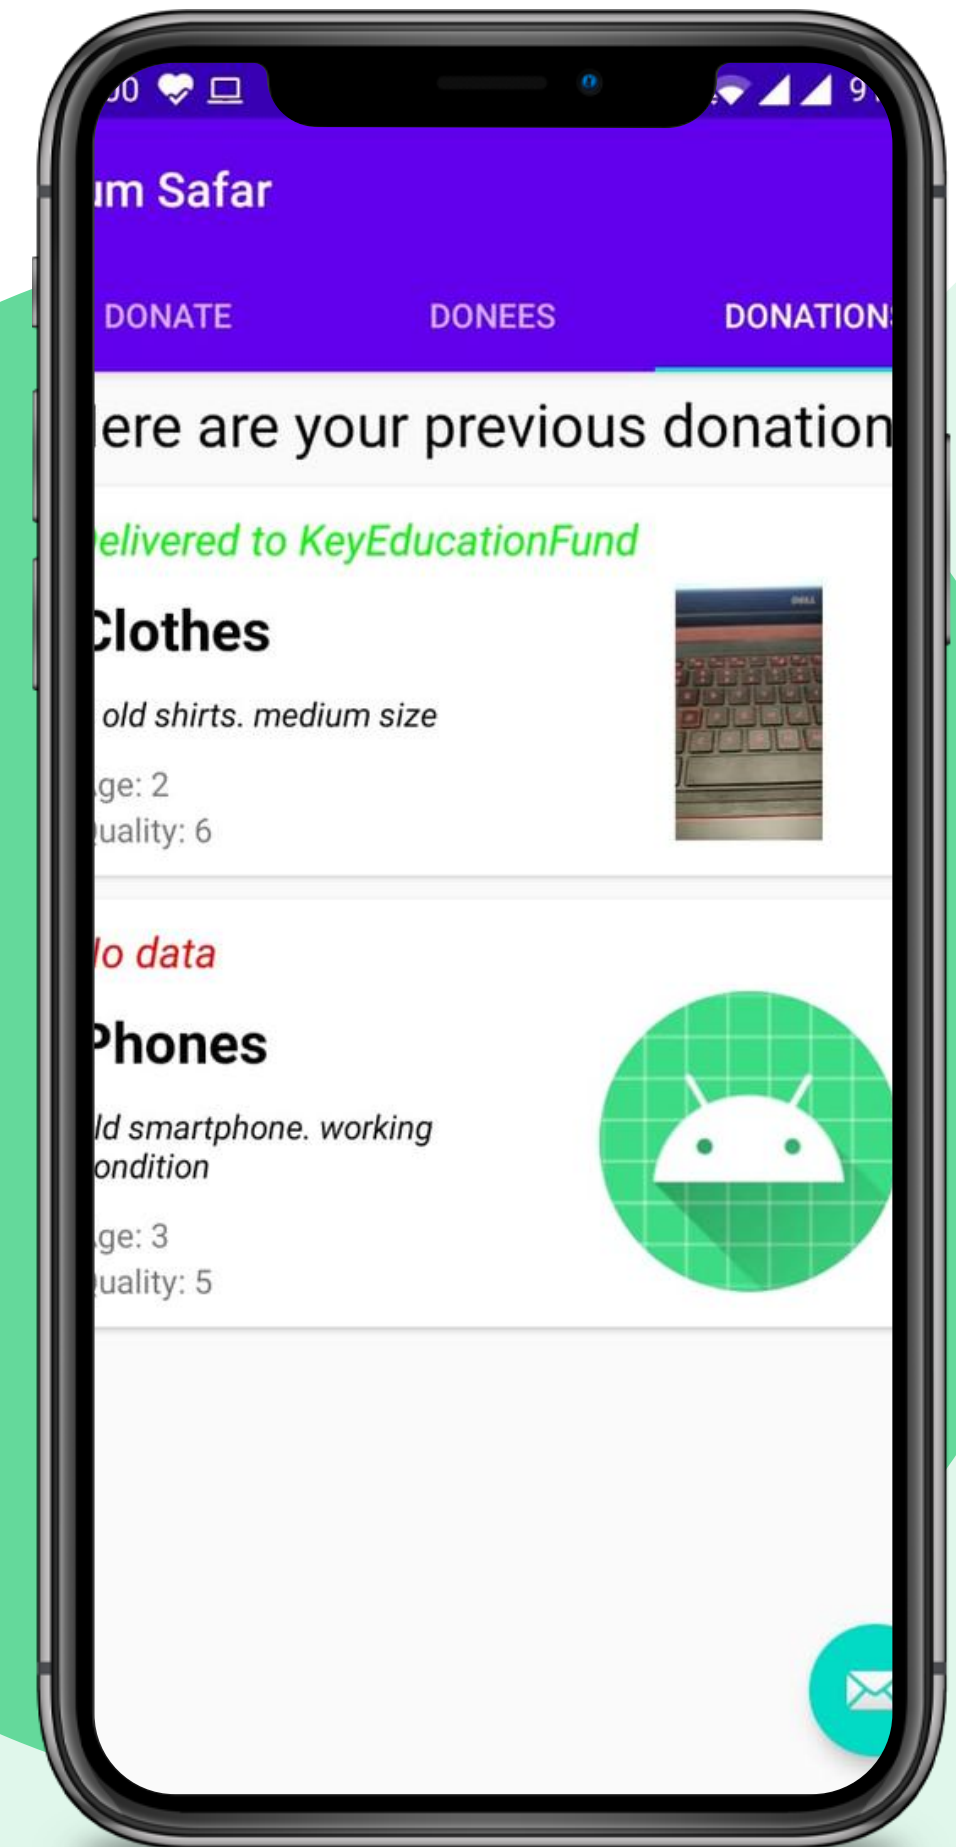

Anonymous Chat Portal

The donor can chat with donee making them aware of various requirements.
The donee can also use chat portal to track the product which is donated to tem

Quality Check

The products donated would be scored by the donee so that quality is not compromised.
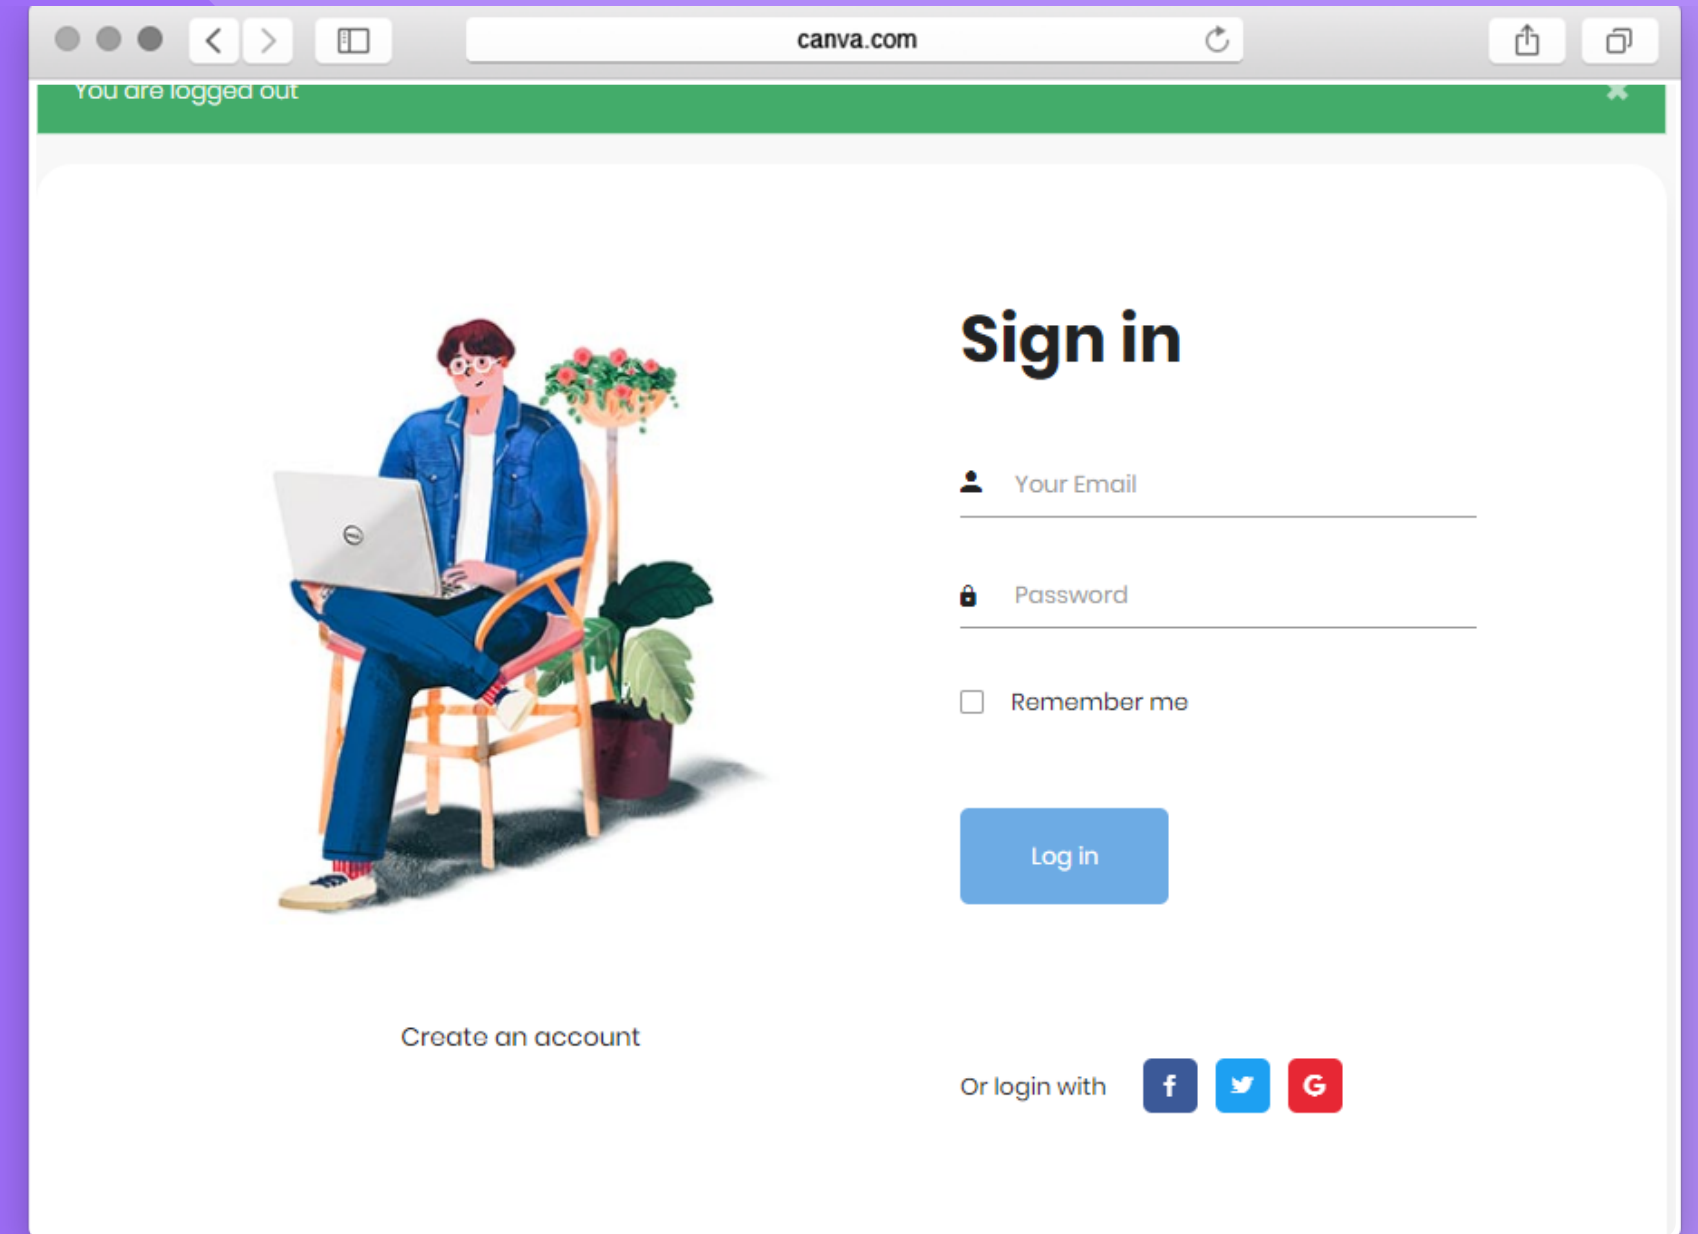

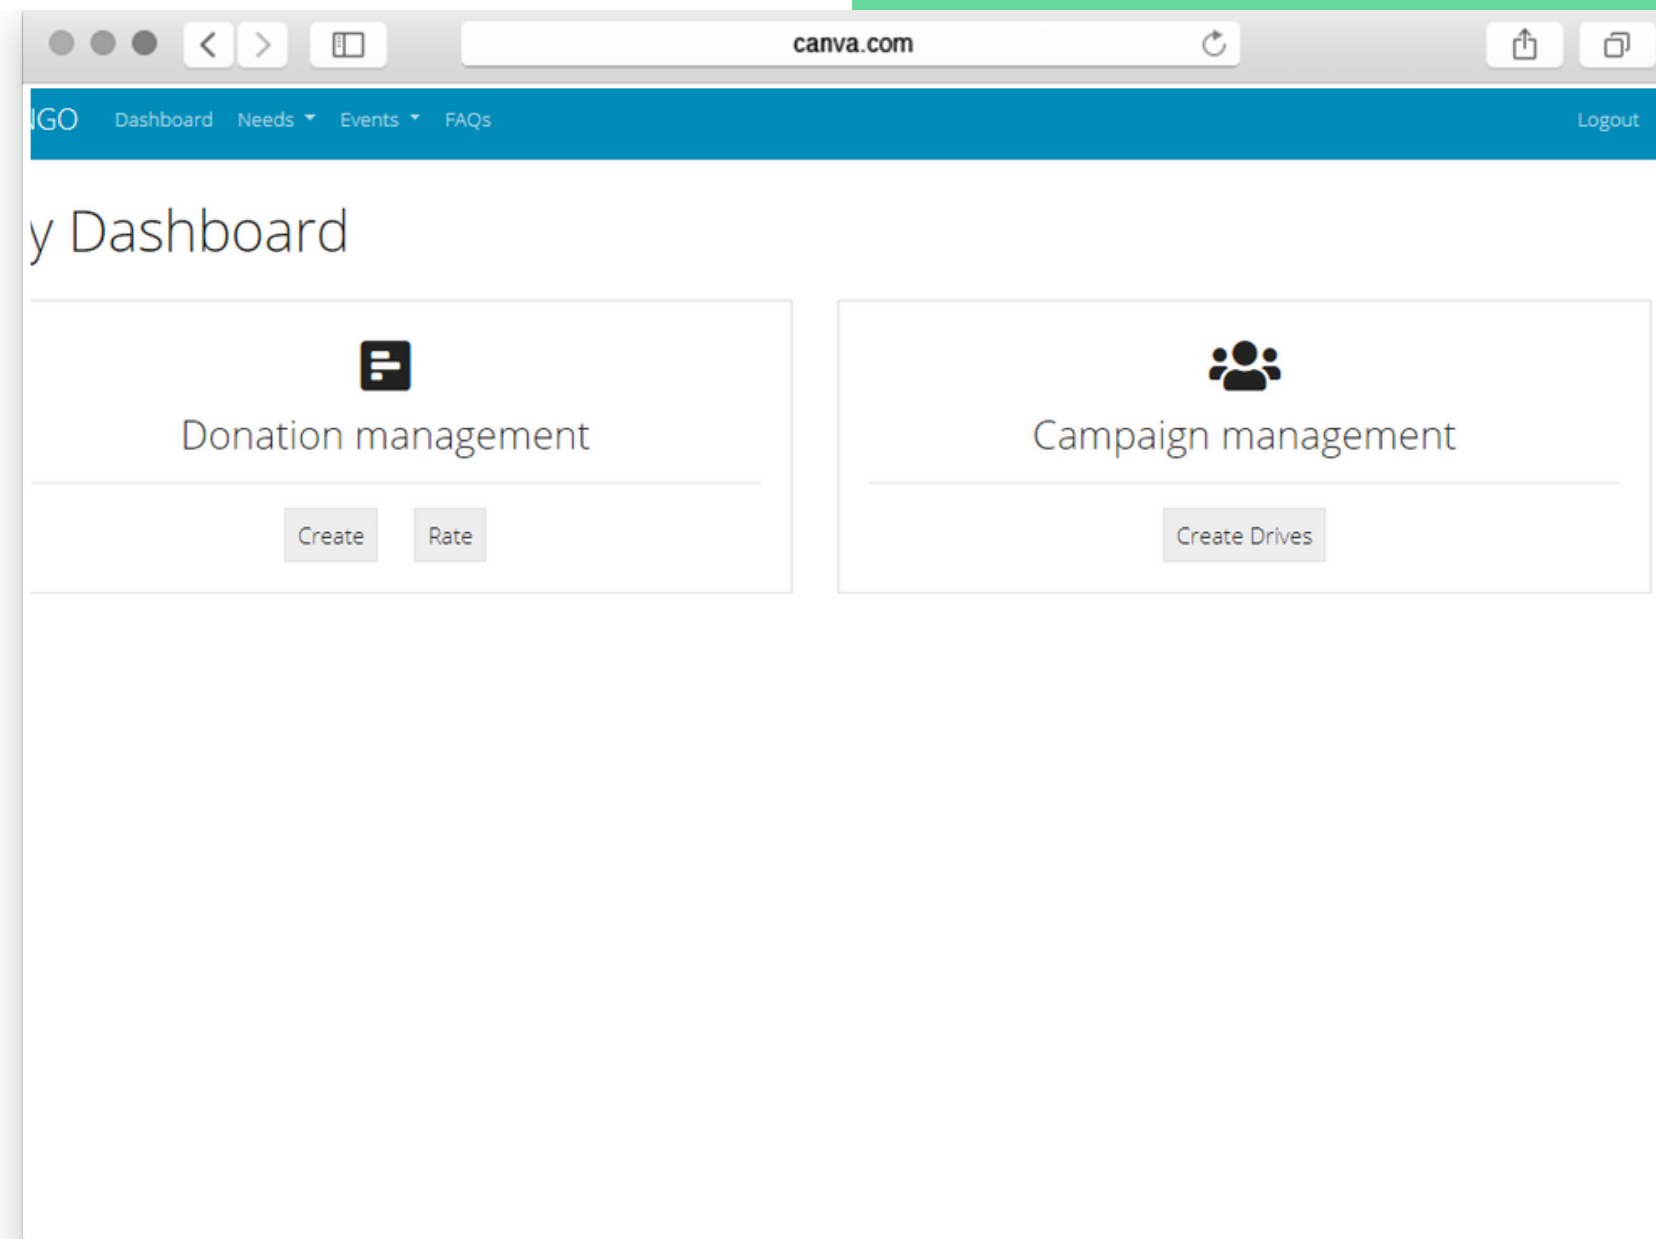

LISTING OF DONOR PRODUCTS

Have Chat with donor anonymously and also track your product 24/7.

WEBSITE

A login portal with a interactive user display for various NGO's to register under "HUMSAFAR" programme.

DASHBOARD

Various organizations registered and verified by U&I could launch campaign drives and post their requirements
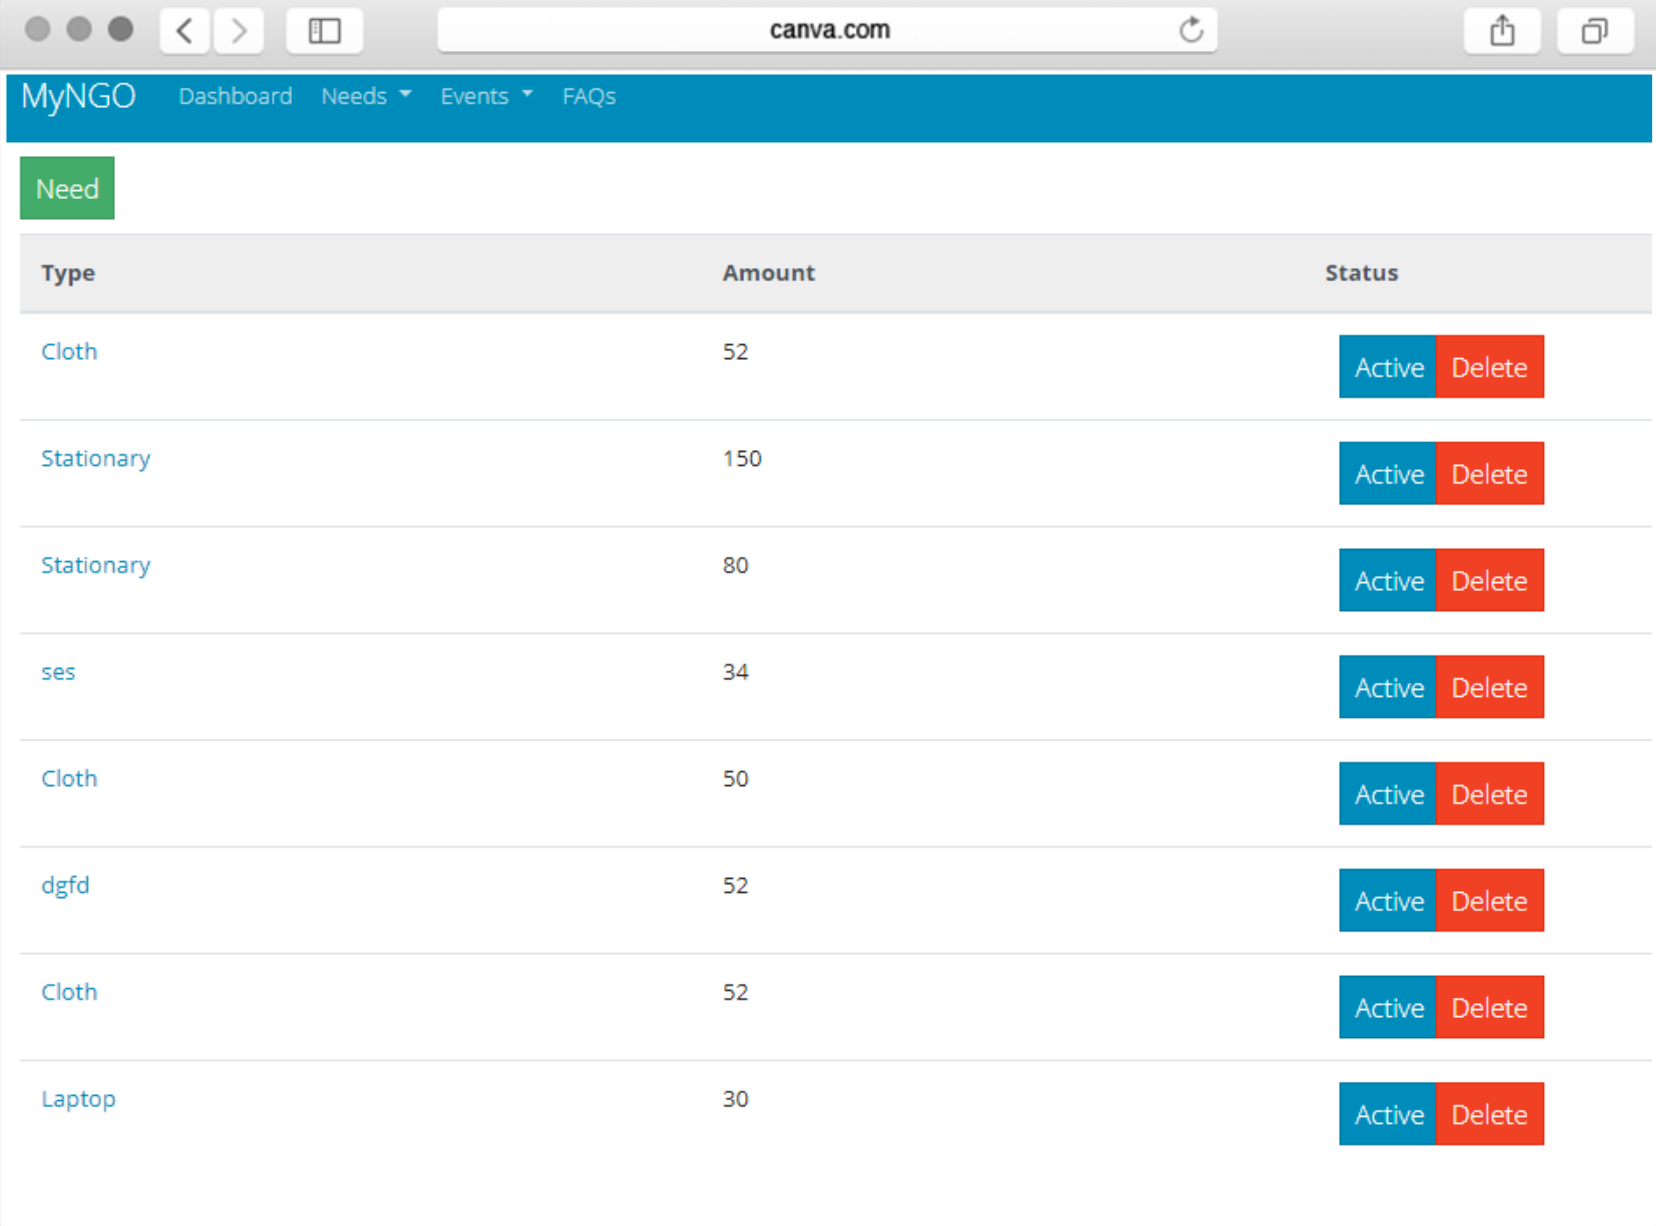

Interactive Chat Portal

Donees can chat with users anonymously. They can also track the orders which are on their way.

REQUIREMENT PANEL

The donor can view the requirement posted by the NGO's. and their status so that they can prepare product before hand.
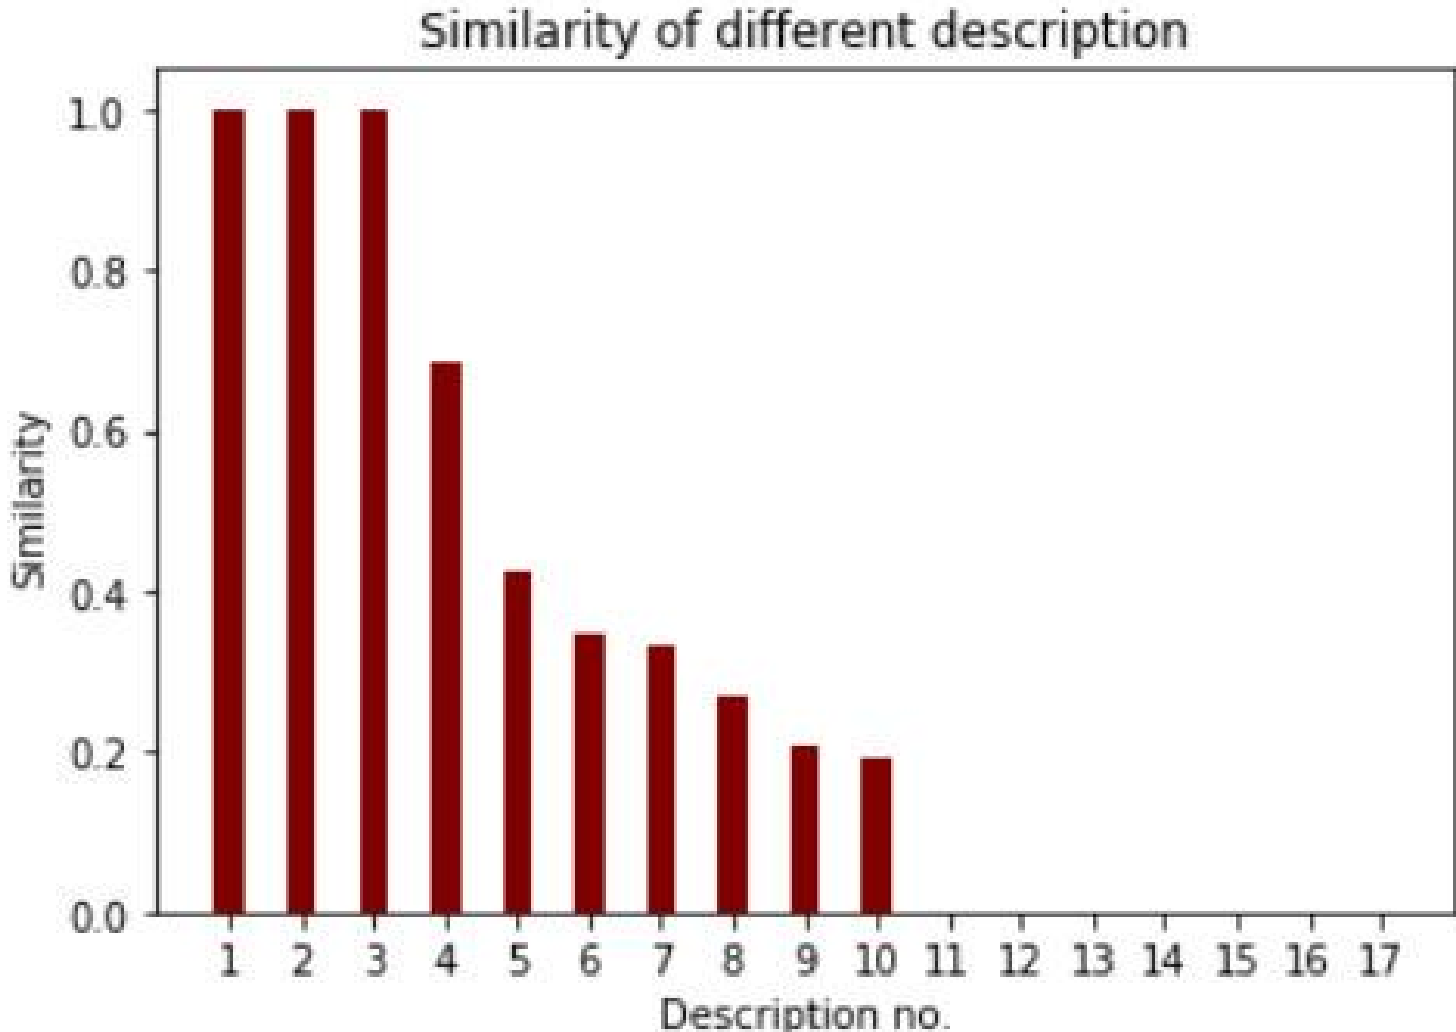

USP OF THE PROJECT-1

Query Ranking using NLP

- Integration of Natural Language Processing Model is done to match the donee requirements with donated items.

- The benefit is two fold:one the NGO cannot hoard the product depending on the price of the items and also it would help in equitable disribution of the resource among donees(NGO's).

Similarity of different description

```
ax = sns.heatmap(uniform_data, linewidth=0.5)
plt.show()
```

USP OF THE PROJECT-2

Corporate Matching Gift programme

- When an employee makes a donation, they'll request the matching gift from their employer, who then makes their own donation. Companies usually match donations at a 1:1 ratio, but some will match at a 2:1, 3:1, or even a 4:1 ratio.

- This feature is just added as a proof of concept in which the donor would add his organization and those organiation would be contacted for donation although keeping the donor ananimous.
